

Art & Design at Coton Green Primary School

At Coton Green Primary School, Art & Design is a subject where creativity, interpretation and imagination come to life. Our aim is for children to enjoy art, enjoy experimenting and enjoy developing techniques and skills where they can express themselves freely.

Through a range of artistic materials, techniques and styles, children gain a deep understanding about great artists and the artistic elements used in pieces. The children are exposed to art across the ages and in turn, with these experiences, are able to use them as influences for their own pieces.

Picasso once said that, 'Every child is an artist,' and at Coton Green we truly believe this. Art means so much to so many and our aim is to give children the confidence and encouragement to enjoy this wonderful subject.
